

📄 EU Transport Sector Climate Targets & Modal Shift Goals

Summary:

This document outlines the official EU-level targets for the transport sector under the Green Deal, Fit for 55, and related directives. Key points include:

- At least 90% reduction in transport-related CO₂ emissions by 2050
- Doubling rail freight and tripling high-speed rail by 2030–2050
- Increasing urban modal share of cycling and walking to >30% by 2030
- Expanding alternative fuels infrastructure and zero-emission trucks

Relevance:

These targets are benchmarks against which Germany's national performance is evaluated.
